

Reccombinant Version of Classic Clone

Cat nr AE00340

Product Datasheet

Mouse Recombinant Antibody, rSV5-Pk to:

SV5-Pk (V5) epitope tag

Epitope tag, also known as GKPIPNPLLGLDST tag; V5 epitope tag; GKPIPNPLLGLDST epitope tag; Pk tag; Pk tag, for the detection of recombinant proteins tagged with the GKPIPNPLLGLDST sequence.

Cellular localization	
Official Symbol (Gene) GeneID SwissProt	
Confirmed Applications Positive controls	WB multitag protein
Aeonian Rating©	100
Purification	By Protein A from bioreactor concentrate
Formulation \square	1 mg lgG/ml in PBS with 0.02% Proclin 300
Amount Isotype	200ug 1000ug Mouse IgG2a, kappa, recombinant chimeric version of mouse IgG1 clone SV5-Pk
Confirmed species reactivity	
Immunogen	A purification fraction of paramyxovirus Simian Virus 5 (SV5) propagated from Vero cells culture supernatant
Epitope	GKPIPNPLLGLDST
Storage instructions	Avoid repeated freeze/thaw cycles. For long term storage, keep small aliquots at -20C or -80C and keep one aliquot at 4C for daily experimentations. Azide will preserve antibody at 4C for 6-12 months, when kept away from direct sun light.
Expiration	Integrity warranted for 24 months after purchase when handled and stored according to instructions, see below.
Warranty	This product is only warranted for the specifications as described in this product sheet and only when the product is handled and stored according to instructions. User should validate this antibody in the application and tissue/cell type as required, after confirmation of integrity upon receipt is obtained by reproducing the performance as described below. Should such confirmation not be attempted, any warranty is void. In case of non-conformance, user needs to contact us immediately for replacement or refund.
Liability	This product is for in vitro research use only. Any other applications, such as diagnostics or therapeutics, or in vivo experiments, and the validation of this product therein, are solely at the responsibility of the buyer/user.
Product performance	see next pages

Product data:

Immunoassays

Western Blot (WB):

The original clone SV5-Pk was successfully used to detect Pk-tagged Fibronectin in transgenic mouse kidney lysates, and V5-tagged ANO5 in COS1 lysates.
